

# 3 DIFFERENT IDEAS TO DESIGN AND CREATE AN APP FOR MY FINAL PROJECT

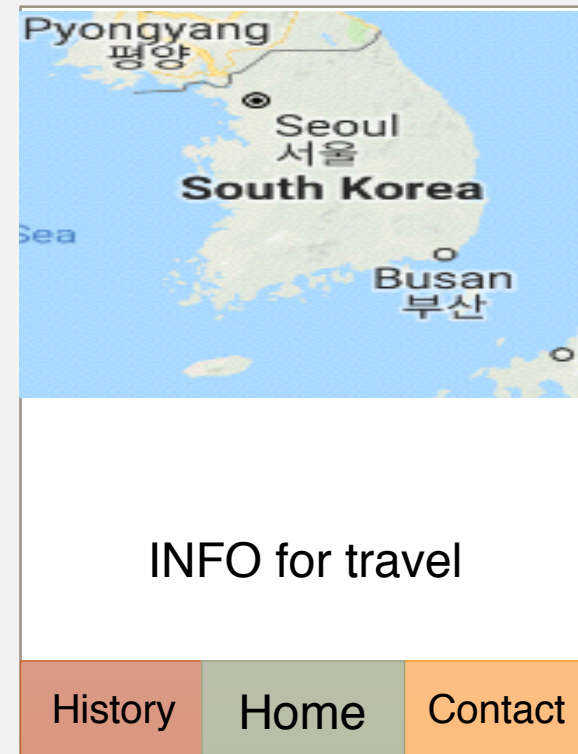

**Ahram Kim 114055134**

# 1. SEOUL TOUR GUIDE

- 3 ways I can make my app better than compete app
  - compete with my app: Tour Guide For Seoul Pro by yongjun yang
  - Making the app looks better for tour guide app by adding pics
  - Adding the (location) map to help to find the location easily
  - Adding information or short history for specific places for introducing Korea
- Who is he general audience
  - People wanting and planning to travel to Seoul in Korea

# 1. SEOUL TOUR GUIDE

- The app idea's main feature
- What mobile technologies required for the app
  - GPS for map, Internet
- The price for the app
  - It will be free because I welcome people who wants to travel Korea.
  - I want them experience in Korea a lot.

## 2. TO-DO LIST

- 3 ways I can make my app better than compete app
  - compete with my app: To Do by Erica Sadun
  - Adding features to put the due date for to do list because time is an important factor to consider with tasks.
  - Adding shortcut tools to delete, complete, extend, to keep tracking the tasks.
  - Making the interface more friendly for the user
- Who is he general audience
  - People who wants to keep track what they to do

## 2. TO-DO LIST

- The app idea's main feature
- What mobile technologies required for the app
  - Database for saving the tasks
- The price for the app
  - It will be free because checking the tasks is always right and needed for all people. It will be very helpful!

Navigation bar		
completed	To do	Extend
Todo List 1		
Using table view		
With core data		

## 3. 360 CAMERA

- 3 ways I can make my app better than compete app
  - compete with my app: 360 Panorama by Occipital, Inc
  - Adding interface more friendly and brighter
  - Adding features to send what I take to a photo album in the phone
  - Adding features to track of the 360 scene more exactly and clear
- Who is he general audience
  - People who wants to save more for landscapes and memory.

### 3. 360 PANORAMA

- The app idea's main feature
- What mobile technologies required for the app
  - Camera, Database, Internet, Bluetooth
- The price for the app
  - It would be 1.99 because the skills for taking 360 panorama pics is tricky and not common these day. I need more work for making this app.

360 PANORAMA
