# DESIGN AND CREATE AN APP FOR MY FINAL PROJECT

Ahram Kim 114055134

I. DESIGN WIREFRAMES

DRAW OR DESIGN WIREFRAMES FOR EACH OF THE MAJOR SCREENS OF MY APP

2. LIST ALL THE MAJOR FEATURES

LIST ALL THE MAJOR FEATURES OF MY APPLICATION AND ADDITIONAL TECHNICAL FEATURES THAT ARE REQUIRED FOR EACH FEATURE.

- There will be three tabs in my application: trip, home, and review

- **In home tab,** there will be photo slide with Seoul images. Each photos will have information for the purpose of my application.

  - History of South Korea.

  - Where Seoul is, What I can experience, and Why I choose Seoul travel app where people can have experience in.

  - A source of pride of Seoul city.

    - Convenient transportation

    - 24 hours amenity.

2. LIST ALL THE MAJOR FEATURES

LIST ALL THE MAJOR FEATURES OF MY APPLICATION AND ADDITIONAL TECHNICAL FEATURES THAT ARE REQUIRED FOR EACH FEATURE.

- There will be three tabs in my application: trip, home, and review

- **In trip tab**, there will be two navigator: what to do, and what to eat.

  - What to do : I will make a table list of things to do or what they can do in Seoul. There will be information about map, transportation, direction to get there, available working time, price for them and etc. (GPS is more work when I have enough time)

  - What to eat : I will make a table list of things to eat or what they can try great Korean food. There will be information about map, transportation, direction to get there, available working time, price, how to eat and etc. (GPS is more work when I have enough time)

2. LIST ALL THE MAJOR FEATURES

LIST ALL THE MAJOR FEATURES OF MY APPLICATION AND ADDITIONAL TECHNICAL FEATURES THAT ARE REQUIRED FOR EACH FEATURE.

- There will be three tabs in my application: trip, home, and review

- **In review tab**, there will be table view with data core. I will make a pop up page which they can fill out their name, email, phone number, and their story or their opinion. People can tell and share their experience what good thing is or what bad thing is. Others can do prior investigation for their trip plan. If people fill out, what they write will be showed in table view. There will be delete button to delete whenever they want. There will be also search bar so people can search what they are going to have trip.

3. DESCRIBE THE DESIGN STYLE

DESCRIBE THE DESIGN STYLE BASED ON MY DEMOGRAPHIC.

- At first, I need to figure out what my target customers like.

- As a young designer, I will make that app that relate to me with great design techniques, a clear message, a professional look, and a friendly look.

- I will design the app for my customer to have idea what I am designing for.

- I will have better grasp of what I am trying to do or what it is I am trying to design for.

4. DESCRIBE MY APP TO CUSTOMERS

IN NO MORE THAN ONE PARAGRAPH (3-5 SENTENCES), DESCRIBE MY APP TO A POTENTIAL CUSTOMER.

- If you are planning to have trip Seoul and get stuck on planning, visit my Seoul trip app. There will be more specific information what you guys want to get. Of course there will be direction to get the places you want to go easily. You also can see another travelers' experience. If it is not good for them, you can pick other places or if it is great for them, then you should visit there.
